Going to great lengths

Take your cue from Hollywood's leading ladies and cheat your way to flowing locks

Long flowing locks can now be yours without spending an entire day at the salon or years of growing pains.

Great Lengths has the perfect solution for the working woman, and can attach a full head of hair in a mere 90 minutes. First your hair is analysed to come up with the perfect length and volume; and once attached, the extensions can be cut or styled so they blend seamlessly and move in exactly the same

way as your own locks. They use real hair, sourced from India, and can be treated as your own – so you don't need to hold back on the straighteners or tonging as heated appliances are safe to use.

The best bit is they are easily removed to reveal your original locks. So, as soon as you crave that Carey Mulligan crop – you can just pop back to the salon to have them taken out.

TOP TIPS to extend the life of your extensions

- Don't wash your hair until 24 hours after the extensions have been placed
- Brush your hair carefully in sections with a brush recommended by your stylist
- When using conditioner, avoid placing it near the bonds
- Plait hair loosely at night to avoid putting strain on it as you sleep
- Hair can be styled as normal with hair dryers, tongs and straighteners

Elle Macpherson adds length to her golden locks with hair extensions

As a firm fan of extensions, Jessica Simpson has even created her own range

Liz Hurley credits her enviable volume to having a helping hand from extensions
